WINIATURE RUGGEDIZED HIGH TEMPERATURE PRESSURE TRANSDUCER

XTEL-100-190 (M) SERIES

- Wide Temperature Capability -65°F To 525°F
- Easy Installation
- Patented Leadless Technology VIS[®]
- High Natural Frequency

The ruggedness of this sensor has not compromised its performance. It was designed for ease of installation and will operate properly in most conductive liquids and gases. Coupled with high temperature, its Patented Leadless Construction makes it possible for the sensing unit to be installed in such a way that will not compromise its high natural frequency. Its wide operating range (-65°F to +525°F) makes it ideal for numerous applications in Aerospace and other areas of industry. Part performance not guaranteed if used in water.

Kulite recommends the KSC Series of signal conditioners to maximize the measurement capability of the XTEL-100-190 transducer.
