Date: July 29th, 2025
Subject: Kulite Semiconductor Products, Inc. REACH Declaration

The European Union (EU) has adopted Regulation No 1907/2006, also known as the REACH (Registration, Evaluation, and Authorisation of Chemicals) regulation, which became effective June 1st, 2007.

Article 33 of REACH requires manufacturers and importers of articles containing Substances of Very High Concern (SVHCs) included on the Candidate List with a concentration >0.1% by weight to provide information to allow the safe use of the article, including, as a minimum, the name of the substance. The Candidate List is published by the European Chemicals Agency (ECHA) on their website.

Article 56 of REACH further restricts certain substances on the Candidate List by including them on the Annex XIV Authorisation List. The Annex XIV Authorisation List is also published by the European Chemicals Agency (ECHA) on their website.

Kulite Semiconductor Products produces “articles” per the REACH definition. Pursuant to Article 7.1 of the regulation, any producer or importer of articles must register a substance present in these articles if both of the following conditions are met:

- a) The substance is present in those articles in quantities totaling over one tonne per producer or importer per year, AND
- b) The substance is intended to be released under normal or reasonably foreseeable conditions of use

Our review has shown that our articles do not fall under the current REACH legislation as described above. Additionally, a review of the June 25th, 2025 revision of the Candidate List and the April 11th, 2022 revision of the Annex XIV Authorisation list against our products shows that our articles DO NOT contain more than 0.1% by weight of any substance on the Candidate List or more than 0.0% by weight of any substance on the Annex XIV Authorisation list.
