Subject: Packaging Material Specifications, Regulation (EU) 2025/40 (“PPWR”)

The Packaging and Packaging Waste Regulation (Regulation (EU) 2025/40 (“PPWR”)) introduces significant requirements regarding packaging placed on the EU market. This new regulation requires that all packages imported to the EU have a Declaration of Conformity verifying the material composition of each packaging component.

Kulite sources its packaging materials from trusted suppliers that provide us Certificates of Conformity with each shipment, which Kulite keeps record of. Additionally, we will now require our packaging suppliers to prove that materials abide by the EU’s heavy metal limits which state that the combined concentration of lead, cadmium, mercury and hexavalent chromium must not exceed 100 mg/kg. We do not offer part-specific packaging specifications, but we have implemented new flow down quality provisions to ensure all of our packaging materials meet the requirements of the PPWR. Please click here to see our full list of flow down quality provisions.
