Subject: Kulite Semiconductor Products, Inc. REACH Declaration

---

The European Union (EU) has adopted regulation no. 1907/2006, also known as REACH (Registration, Evaluation, and Authorization of Chemicals) regulation, which became effective 1<sup>st</sup> June, 2007.

Article 33 of REACH requires manufacturers and importers to provide the recipient of the article with a declaration of any Substances of Very High Concern (SVHCs) on the candidate list in the articles they sell that are >0.1% by weight, including the name of the substance. The candidate list is published by the European Chemicals Agency (ECHA) on the web-site.

Article 56 of REACH further restricts certain substances on the Candidate List by including them on the Annex XIV Authorisation List. The Annex XIV Authorisation List is published by the European Chemicals Agency (ECHA) on their website.

Kulite Semiconductor Products produces “articles” per REACH definition. Pursuant to Article 7.1 of the regulation, any producer or importer of articles must register a substance present in these articles if both of the following conditions are met:

- a) The substance is present in those articles and in quantities totaling over one ton per producer or importer per year, AND
- b) The substance is intended to be released under normal or reasonably foreseeable conditions of use

Our review has shown that our articles currently do not that fall under the current REACH legislation as shown above. Additionally, a review of the latest candidate list and the latest Annex XIV list as of the date of this declaration against our products shows that our articles DO NOT contain more than 0.1% by weight any substance on the Candidate List or more than 0.0% by weight any substance on the Annex XIV list.
